

tesseract_collision
/include/tesseract_collision
/bullet/tesseract_compound
_compound_collision_algorithm.h

```
graph BT; A["tesseract_collision  
/src/bullet/tesseract  
_collision_configuration.cpp"] --> C["tesseract_collision  
/include/tesseract_collision  
/bullet/tesseract_compound  
_compound_collision_algorithm.h"]; B["tesseract_collision  
/src/bullet/tesseract  
_compound_compound_collision  
_algorithm.cpp"] --> C;
```

The diagram illustrates the relationship between two source files and a header file. At the top is a grey box representing the header file: `tesseract_collision/include/tesseract_collision/bullet/tesseract_compound_compound_collision_algorithm.h`. Below it are two white boxes representing source files. The left box is `tesseract_collision/src/bullet/tesseract_collision_configuration.cpp` and the right box is `tesseract_collision/src/bullet/tesseract_compound_compound_collision_algorithm.cpp`. Blue arrows point from each source file box up to the header file box, indicating that both source files include or depend on this header.

tesseract_collision
/src/bullet/tesseract
